Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the feature "A method for performing In-line expansion" in the preamble. However, the body of the claim is silent on the method steps required to achieve performing in-line expansion.

Claims 2-7 being dependent on the rejected claim 1 above are also rejected based on the same rational.

Claim 8 recites the feature "A system for performing In-line expansion" in the preamble. However, the body of the claim is silent on the steps required to achieve performing in-line expansion in a system.

Claims 9-16 being dependent on the rejected claim 8 above are also rejected based on the same rational.

Claim 17 recites the feature "A storage medium encoded with machine-readable program for performing In-line expansion" in the preamble. However the body of the claim is silent on the steps required to achieve performing in-line expansion in a storage medium.

Claims 18-23 being dependent on the rejected claim 17 above are also rejected based on the same rational.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 24 is rejected under 35 U.S.C. 102(b) as being anticipated by Wolf et al.
U.S. Patent 5,818,447.

As per claim 24, Wolf et al. disclose "a data record comprising record header data; record body data; and a record display flag, wherein status of said record body display flag controls display of said record body data; said status of said record body display flag being responsive to selection of said record header data" (See Wolf et al. Figure 11 and corresponding text).

Allowable Subject Matter

Claims 1-23 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record failed to show **a mechanism for setting a record body display flag on or off.**
